

LIFELINKcentral™ AED Program Manager

Readiness matters.

Take charge with a complete, connected solution for AED program management.

AEDs work.

But only if they're ready.

Sudden cardiac arrest (SCA) can happen to anyone—anywhere. That's why public access defibrillators are so important. They put lifesaving technology where it can do the most good. Ongoing system maintenance, however, has been time-consuming and at risk for errors—until now.

With LIFELINKcentral AED Program Manager, managing your AEDs has never been easier or more accurate. Not only will you know for certain that your AEDs are ready when you need them, you'll also save time and money on your AED program management by eliminating manual checks for connected devices and more efficiently tracking status even for non-connected ones.

Connected and ready.

With the LIFEPAK CR2 Defibrillator, a Wi-Fi® or cellular network-connected AED, LIFELINKcentral Program Manager facilitates self-management. Location, battery status and other readiness information are automatically collected by the software for easy management via the online dashboard*—whether you have one AED or 100, in a single office or across thousands of miles. LIFELINKcentral AED Program Manager even sends you alerts of any condition affecting AED readiness.

For each connected LIFEPAK CR2 device, you can:

- Remotely monitor readiness information
- Locate on a map and detect location changes
- Receive alerts of any situation affecting readiness such as battery status
- View a dashboard with the status of all connected AEDs*
- Be alerted when an AED has been used
- Send SCA event data via Wi-Fi to emergency responders en route
- Automatically send event data and reports to hospital and medical caregivers
- Get notifications if batteries or electrodes are expiring or have expired
- All without manual inspection

Complete management system.

You can manage all your AEDs with LIFELINKcentral AED Program Manager, even those that aren't connected. Just enter device information manually, then update inspection data on a regular schedule. You'll have complete documentation of your readiness. You can even pinpoint them on a map and create alerts for scheduled battery or electrode replacement.*

A plan for every AED program.

Basic LIFELINKcentral AED Program Manager access is included with each LIFEPAK CR2 Defibrillator, but there are numerous reasons to invest in a full-featured service package.

* Services are via wireless for LIFEPAK CR2 AED Wi-Fi, Wi-Fi+3G, and for all other Physio-Control AEDs through remote assistance, or onsite when available in your geography.

Be sure you're ready.

We envision a future where better technology enables better outcomes—and more lives saved. When SCA strikes, you want the best for your employees, customers, students and the public. That's why we've created the simplest and most comprehensive AED management system available. LIFELINKcentral AED Program Manager automates AED program management for connected LIFEPAK CR2 devices and can be used to manually manage all LIFEPAK and HeartSine AEDs.

For more information, please contact your local Physio-Control representative or visit our website at www.physio-control.com.

If you purchased your LIFEPAK CR2 Defibrillator from an authorized Physio-Control distributor or reseller, this distributor or reseller will have access to your LIFELINKcentral AED Program Manager account and may receive notifications prompted by the LIFEPAK CR2 Defibrillator. Please note that this setting can be disabled at ANY time: if you wish to disable this setting, please send a request to Physio-Control Customer Support to change the Distributor value to "Customer Managed".
